Suicide Data: Georgia

Suicide is a public health problem and leading cause of death in the United States. Suicide can also be prevented — more investment in suicide prevention, education, and research will prevent the untimely deaths of thousands of Americans each year. Unless otherwise noted, this fact sheet reports 2020 data from the CDC, the most current verified data available at time of publication (March 2022).

### 12th leading cause of death in Georgia
