Suicide Data: New Hampshire

Suicide is a public health problem and leading cause of death in the United States. Suicide can also be prevented – more investment in suicide prevention, education, and research will prevent the untimely deaths of thousands of Americans each year. Unless otherwise noted, this fact sheet reports 2020 data from the CDC, the most current verified data available at time of publication (March 2022).

**9th leading cause of death in New Hampshire**

- 2nd leading cause of death for ages 10-24
- 2nd leading cause of death for ages 25-34
- 3rd leading cause of death for ages 35-44
- 4th leading cause of death for ages 45-54
- 7th leading cause of death for ages 55-64
- 17th leading cause of death for ages 65+
